BLUE GUIDE EMC LAB: electromagnetic immunity and radiation

SGS: electrical approval and safety

SIGFOX: Internet of Things connectivity

IoT integration*

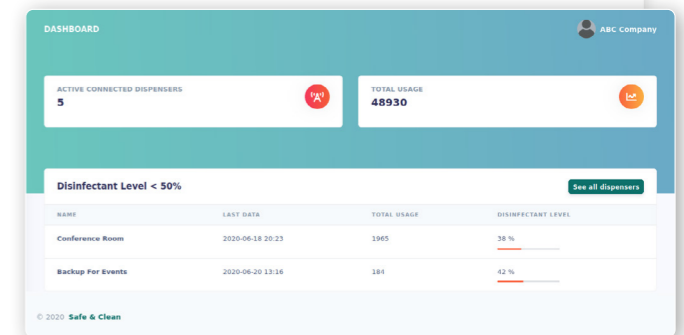

Safe and Clean dispensers are equipped with IoT technology for an efficient management and maintenance. The IoT system gives you access to a web

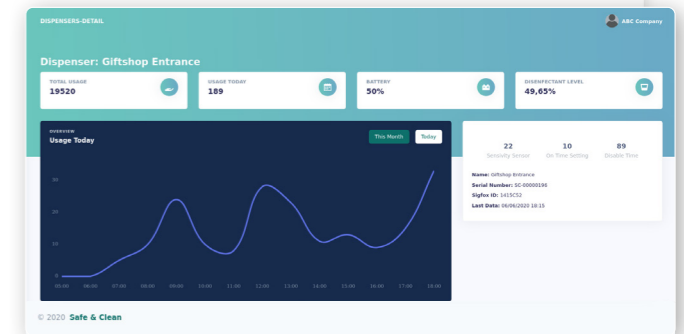

interface on which you can consult the following data for each dispenser: liquid level, location, number of sprays per day, reports and statistics, etc.

You also have the possibility to remotely adjust the spraying time (dosage), set up Disinfectant Refill, turn the dispenser on/off, etc.

* Data license is required

Client's dashboard: Cockpit view on all key data from every unit

Data analysis: Analyses, evolutions, aggregates and prediction algorithms. Adapted interface for mobile use
